PROFILE SUMMARY

Technical Support Engineer with **3.5 years of experience** in IT operations and systems support. Strong background in incident management, user onboarding, monitoring, and troubleshooting enterprise applications. Currently transitioning into Cloud and DevOps roles through hands-on projects and certifications, with practical exposure to AWS, CI/CD pipelines, and basic infrastructure automation.

CORE SKILLS

Operating Systems	Linux (Ubuntu, Amazon Linux, RedHat), Windows
Cloud (Hands-on)	AWS: EC2, S3, IAM, VPC, Route 53, CloudWatch, SNS
DevOps (Project-based)	Docker, Jenkins, Git & GitHub, Terraform, Ansible
Monitoring	CloudWatch, Splunk, basic Prometheus, Grafana exposure
Scripting	Bash, Python (utilities, reporting)
ITSM	ServiceNow, Jira, Incident and Change Management
Networking	DNS, TCP/IP, ports, HTTP/HTTPS

PROFESSIONAL EXPERIENCE

Associate Engineer - Systems Operations PFS Commerce / GXO Logistics, Bangalore

Aug 2023 – Jan 2026

- Provided L1/L2 technical support handling incidents, service requests, and access issues for enterprise users.
- Managed user onboarding and offboarding, account creation, and access permissions using Active Directory / Entra ID.
- Monitored system health metrics such as CPU, memory, and application availability; escalated issues based on thresholds.
- Used CloudWatch and Splunk to review logs, alerts, and recurring operational issues.
- Collaborated with development and reporting teams to execute scripts and pull operational reports for clients.
- Supported environments related to AS400 systems and global operations teams.

Technical Support Engineer PFS Commerce, Bangalore

Aug 2022 – Aug 2023

- Delivered day-to-day technical support for email, VPN, SSO, and internal applications.
- Performed ticket triage, troubleshooting, RCA documentation, and escalations.
- Used Python and shell scripts for basic automation such as report generation and system checks.
- Ensured SLA compliance and clear communication during incidents.

PROJECT EXPERIENCE

AWS Two-Tier Application Deployment

- Deployed a two-tier web application on AWS using EC2 and security groups.
- Configured Route 53 to route traffic to the application.
- Implemented a CI/CD flow where code commits trigger build and deployment using Jenkins and GitHub.
- Focused on understanding deployment flow rather than production-scale optimization.

Infrastructure Automation - Terraform & Ansible

- Provisioned EC2 instances and security groups using Terraform.
- Used Ansible for application setup and configuration management.
- Emphasis on reproducible infrastructure and learning IaC fundamentals.

CERTIFICATIONS

- AWS Certified Cloud Practitioner - AWS
- DevOps & Cloud Computing Course - Saidemy
- Computer Networking Fundamentals - Udemy
- API Fundamentals - Udemy

EDUCATION

Bachelor of Computer Applications (BCA)
Izee Group of Institutions, Bangalore
